About

A typeface that draws on 90s deconstructions

Weyni is a display typeface that brings a different take on the craftsmanship, the reinventions, and the futuristic sense of the 90s, where the communication was driven by the hunt for new typographic forms.

It's a robust humanist sans-serif that works well for both online and printing environments. That comes with modern and charming handmade-like characters: its curved corners, chunky stems, and taut lines were designed for large types. These signature details and a distinguishable personality make this typeface best suited for headlines or other short copy that needs attention drawn to it. Editorial projects, titles, and posters can also explore this vibrant and hard-working typeface that was crafted to be more legible.

Every style of Weyni was created with some asymmetrical lines, heavy gestures, and subtle forms, just like the deconstructions and experimentations that are references for the 90s nostalgia, as seen in magazines, typographic collages, products, and all the pop-cultural currents of that era. Thus, as it has a humanist design style, the typeface contains variations in widths and proportions, with quirky characters (like the lowercase a and e; the B, the X, and the Y) among a few traditional shapes. Such singularity embodies the desire to break some rules and is fueled by the raw emotion in every form. That gives the design an urban, expressive, and handcrafted feeling to the digital age.

Weyni comes in three weights and two styles and offers multi-language support. It's also available as a web font, specifically engineered for different screen sizes.
